

Landreth Fastener

Landreth is a leading manufacturer of cold headed solid, semi-tubular and brake rivets, with ISO certified quality systems and a focus on customer service.

Established in 1962, Landreth advanced from owning a single piece of cold heading equipment to become a 35,000 square foot manufacturing facility with 27 cold headers, a precision machine shop, a supporting tooling shop and an automatic inspection/packaging area. Their production of solid and semi-tubular rivets, cold headed specials, and precision machined parts has supported Landreth's customer base of furniture, appliance, automotive, and oil/petrochemical-related companies.
